This year's Summit will address specific challenges that metals trading companies have been facing around:

MARKET RISK

How does price volatility and risk related to the market itself have a direct impact on profit?

SUPPLY CHAIN RISK

How can metals trading companies ensure a more secure supply chain?

REGULATORY RISK

How is the regulatory framework changing?

COUNTERPARTY RISK

What are the trends in this space? How can counterparty risk be mitigated?

FINANCIAL RISK

How companies can reassess and improve currency risk management in line with the overall framework?
